

FCC- Even though the traffic and weather is not available yet in my area, i have found it to be so helpful on many trips to atlanta and to orlando. This provides service unlike anywhere else. We the paying subscribers have made this possible and it should continue to happen. Just because XM threatens on FM stations doesn't mean they should bully around this service. They need to learn to coexist or just go off the air. Please reject petition 04-160 don't silence something great. Everyone nowadays just copys one another, I'm aorry the FM people feel threatened, they should, XM is something fresh and new that has been needed since the beginning of radio.
